

QUALITY POLICY

We hereby thank our precious Customers, our estimated Suppliers, the pleasant Visitors, for their consent and trust placed in these years of serious collaboration.

In 2024, Antincendi Unidet has celebrated its 50th anniversary, the quality of the products and services provided has been maintained from the beginning at the top of our possibilities and expectations, as well as customer satisfaction. The solid foundations laid by the founders, Mr Seluse Casini and Mrs Lucia Allocchio, were the beginning of a long journey that influenced the working method of the entire Company.

We aim above all to provide products and services complying with the current standards, contractual requirements, and employment requirements, with economic analyses as competitive as possible. Together with our collaborators, we are committed to consolidating the good name and the image conquered and maintained in these years of changes, updates, and new rules.

Antincendi Unidet carries out its activities in the utmost transparency and ethics, with moral integrity and correctness, pursuing the statutory purposes in compliance with the mission of the Company, as defined by the Code of Ethics available on the company website www.unidet.eu.

To achieve the objectives our Management has decided to adopt a **Company Quality Management System** in accordance with the standard and in order to meet its requirements, the criteria of such guidelines have been taken into account. Our components for firefighting systems comply with the norm **PED 2014/68/EU** where applicable and **Regulation EU 305/11**, where applicable, according to the norm EN 12094 and they are manufactured in accordance with the same norm; The compliance is extended to the **T-PED 2010/35/EU** norm according to the following norms: UNI EN ISO 10297, UNI EN ISO 17871, UNI EN ISO 14246.

At the end of the year 2020, we achieved the **SIL2** certification. The products covered by this certification are pressure switches ATEX and electric actuators ATEX.

An important goal has been the certification for **protection caps and (EN11117) ring nuts**, achieved at the end of 2021. At the end of the year 2022, we obtained the **flexible fittings** for gas extinguishing systems certification (**code MK.3-8**), in 2023, the certification of the **lock-out valves – code OACL4R (CPR EN12094-6)** and in 2024 the certification of the **new directional valves – code DV-xx (CPR EN12094-5)**.

We operate in compliance with the law of **Privacy** and in compliance with the mandatory rules on **Health and Safety of workers** and **Social Business Responsibility (SA8000)***.

In 2024 the company started work on developing new operational spaces, ideal for staff and welcoming for customers, optimal spaces to carry out technical tests, studies, and product research, and what is necessary for the development of the company. The results of the audits, the customer satisfaction survey, the quality of products and service are subject to analysis and continuous improvement.

In addition, even during regular work in the Company, both through internal audits and risk analyses/opportunities and during regular control activities, we involve the Staff to further raise their awareness on the objective of **Quality**. The satisfaction of our Customers, the serene collaboration of human resources, the operational seriousness, and the image of our Company and last but not least profit, are the fundamental principles that push us to operate with constant commitment and personal satisfaction.

*In consideration of the high costs necessary to certify/maintain the norm SA8000, for the moment we have decided to continue the completion and the management thereof unofficially, since it is our interest to deepen this theme that belongs to us in a special way.

Cornaredo, December, 2024
